Howdy! My name is Garrett Guerrero. I am a computer science student who hopes to become a software developer who specializes in Artificial Intelligence. In high school I was given the opportunity to gain research experience by participating in the Intel International Science and Engineering Fair and fell in love with the scientific method. This semester, I will be participating in AI research and am planning to conduct research of my own during my senior year. I have worked as a barista at Starbucks where I was able to gain important time management, communication, and organizational skills and plan to carry these skills with me as I enter the workforce.

## WORK EXPERIENCE

6/21 – 8/21

### **BARISTA, STARBUCKS**

Preparing beverages and food, taking orders (drive-thru, café, and mobile), pre-closing and closing duties (washing floor mats and dishes; changing out powders, syrups, and whipped cream canisters; restocking merchandise; sweeping, mopping, taking out trash, etc.).

## EDUCATION

AUGUST 2020 - PRESENT

### **COMPUTER SCIENCE, TEXAS A&M UNIVERSITY**

Enrolled in the Engineering Honors program with a 3.633 GPA. Recipient of scholarships from Lockheed Martin, Rocco C. Caffarelli, the College Board, the Houston Livestock Show and Rodeo, San Angelo Area Foundation, and the Laura and Gilbert Schmidt endowment. Currently completing courses primarily focused on programming and statistics.

## TECHNICAL SKILLS

- C++
- Java
- HTML/CSS
- Statistics

## GENERAL SKILLS

- Quick Learner
- Problem Solver
- Detail-Oriented
- Time management

## ACTIVITIES

While computer science is my career choice, I love learning new things and involving myself in extracurriculars. In my spare time I delve into new hobbies, becoming familiar with skills ranging from knitting to playing the guitar to woodworking to graphic design. This past year, I have been acting as an assistant director for the Sophomore Leadership Organization SPIES (Sophomores Progressing in Excellence and Sustainability). In this position I am not only be giving back to the current sophomore class, but to the Bryan/College Station community through the promotion of sustainable practices in the community and fundraising for sustainability-focused organizations.
